## Retention Rates

The following tables provides the fall-to-fall and fall-to-spring retention rates for fall enrollment cohorts. Fall-to-fall retention rate is the rate of return from the initial fall term to the next year’s fall term. Fall-to-spring retention is the rate of return from the initial fall term to the next term.

The first table includes the retention rates for all degree-seeking undergraduate students based on enrollment in the given fall term. Any student who graduates from Chatham before the retention term is excluded from the calculation.

The second table provides retention rates for the incoming first time, first-year cohort of the given fall term.
